

## **PUBLIC NOTICE**

RE: COVID-19

April 1, 2021

A staff member notified MMLA on Wednesday, March 31, 2021 regarding they had tested positive for COVID-19. This person was in the building for two days during the health department's contagion window; which was on March 29 and 30, 2021. The staff member did not experience symptoms until the morning of Wednesday, March 31 and was not at the school while experience symptoms. The health department states those within six feet of those who tested positive for 15 minutes or more should quarantine; all other staff members and parents associated with the students in the classroom(s) within these guidelines were contacted and given quarantine information. We are very confident that our health and safety guidelines are working.
