

PUBLIC NOTICE

RE: COVID-19

April 15, 2021

A staff member notified MMLA on Wednesday, April 14, 2021 regarding that they had tested positive for COVID-19. This person was in the building for one day during the health department's contagion window; which was on April 13, 2021. The staff member did not experience symptoms while at the school. The health department states those within six feet of those who tested positive for 15 minutes or more should quarantine; all other staff members and parents associated with the 5 students in the classroom(s) within these guidelines were contacted and given quarantine information. We are very confident that our health and safety guidelines are working.
